Troy	Archer	4-H/Youth Development	I am employed with the City of Winfield and have worked at the Winfield Water Treatment Facility since 2004. I also own and operate a small farm east of Winfield.	For approximately the past 5 years I have been assisting youth in the Cowley County Shooting Sports program as an archery coach. I have also assisted the Cowley 4H extension agent organize the Cowley County Spring Livestock Show the past couple of years. I have also been serving as the Cowley County 4H Goat Superintendent for approximately the past 2-3 years.
Daniel	Higdon	4-H/Youth Development	I am a father of two active 4H youth and hold an Ed.D. in Organizational Leadership and M.Ed. in Technical Teacher Education. I am trained in and have acted as a STEM project leader for 4H. As a full-time post-secondary educator since 2012, I professionally teach Safety, Technical Skills, and Workplace Soft Skills in engineering and technology-related fields. I have also taught youth at summer camps, church youth groups, and in CMA's Youth Movement. I previously worked in 4H's Tech Wizards and SkillUSA afterschool programs, where we paired high-school and college mentors with elementary and middle school aged students working on Robotics. Through this work, I've witnessed how structured mentorship helps young people develop both technical abilities and essential life skills. I am active in several committees throughout Butler and Cowley County, as well as at my church. I enjoy supporting 4H's mission to enrich and expand our youth so they can truly find their passions and pursue them into a happy and fulfilling adulthood.	I am a certified national trainer for Robotics through FANUC and a nationally certified Work Ethics trainer. I am an OnCourse Ambassador and trained in AVID, with experience implementing student-centered learning techniques for adult and high-school aged students, including through faculty development classes for post-secondary teachers. I am an OSHA authorized Outreach Trainer and have passed multiple OSHA 503 courses, which evaluate a student's understanding of, and teaching techniques for, teaching safety. I teach PLC, Robotics, Instrumentation, Engineering, Manufacturing, and Electronics to adult and youth learners. I have facilitated 4H Tech Wizard grants through 4H, as well as receiving training as a STEM Project Leader by Butler County's 4H group. I have led 4H projects for elementary and middle school aged students in various STEM activities and acted as a Group Project Leader at the Club Level for Building Block Engineering and Interior Design.
Marilyn	Pellegrini	4-H/Youth Development	Born, raised and still reside on family farm near Udall. Kansas. Former 4-H member and recipient of 4-H Key Award. Mother to two 4-H members and grandmother to 4 current Cowley County 4-H members. Retired after serving as a procurement agent for aerospace companies for over 35 years.	I have served as a Girl Scout leader, Sunday School teacher and 4-H project leader. Currently serving as President of Udall Fall Festival and Church Deconess. Also have previously served on Cowley County 4-H committees.
Roy	Hervey	Agriculture and Natural Resources	I am a Farmer in Cowley County. I was a 4H member in sumner co. as a kid. I started farming in 1993 near Belle Plaine Ks. as a junior in high school on some of my grandads land. My wife Sheryl and I have 3 kids that were all involved in 4H, our youngest Wade is the only one in 4H now. I have served on the extension council in the past.	4H
Kevin	McFarland	Agriculture and Natural Resources	Farmer /rancher in Cowley County for 20 + years . Graduated from Oklahoma state university in 2007 with a Bachelor degree in rangeland ecology and management. Working directly with KSU extension throughout the years, I have an understanding and appreciation for the roles that they fill and the services/programs they provide.	I have assisted in planning programs with KSU extension in the past while working for the natural resources conservation service. Also provided numerous training and educational programs for natural resources conservation service in the Kansas grazing Land coalition over the last 15 years.
Kyle	Smith	Agriculture and Natural Resources	My Brother and I are partners in a 5th generation farming operation growing wheat, corn, soybeans, sorghum, and cotton. We also own South Central Precision Ag LLC specializing in selling and servicing precision farming gps products and aftermarket premium parts to improve performance of ag equipment. I have served three terms (9 years) on the Two rivers coop board as well as three years on local rural water district #1 board.	Growing up, I was a member of the Martha Washington 4-h club and participated in Cowley county beef project. As a grain producer, I have attended several different educational events on managing herbicide resistant weeds as well as reducing tillage on our farm. Now my three kids are involved in the Cameron 4-h club and the are participating in many activities such as Catch a calf program, broiler contest, and more.

Bill	Mueller	Community Development	As a, now, semi-retired farmer and law enforcement officer, I previously served terms on the Agriculture and Natural Resources PDC and on the Executive Board as President and Treasurer. I am also a member of my Rural Water District Board, a member of the Cowley County Historical Society Board, and a member of various organizations with the Presbyterian Church. I also am a member of the Fall for Extension committee that continues to assist in raising funds to support the agents of our Extension Service who diligently work to provide the level of extension services we have come to expect despite the diminished level of financial support from KSU and Cowley County.	As a still, somewhat, active farmer I often use, and have previously even more, used the valuable services provided by our Extension Service. As a prior PDC and Board member I was able to observe and help, as able, with many of the worthwhile programs and services available and provided to our county] residents throughout the entire county.
Lisa	Muxlow	Community Development	I teach JAG-K, Jobs for America's Graduates, at the Winfield Middle School. This class focuses on career readiness, financial literacy, community service, and so much more. My children have been involved with 4-H for 5 years and participate in meat goats, photography, woodworking, baking, LEGO projects, and fashion review. I coached my daughter's Rec volleyball team and am heavily involved with my church.	I have experience supporting youth educational programs by creating engaging, age-appropriate lessons, activities, and communication materials. I frequently develop curriculum for middle school programs like JAG-K, focusing on career readiness, financial literacy, leadership, and soft-skill development. My work includes writing lesson plans, bell ringers, event communications, and hands-on activity ideas designed to build confidence and real-world skills in students. While I don't personally participate in K-State Research and Extension Cowley County programs, I am familiar with the types of services they provide, such as youth development, financial education, career exploration, and community engagement.
Gage	Werner	Community Development	I have several years of experience in public education teaching science. My involvement and awareness of Extension programs have been indirect and have resulted from years of participation in local farmers markets and the local foods movement.	I have always found the efforts of K-State Research and Extension Cowley County to be very beneficial to the community and have tried to support their efforts when I can.
Stacey	Higdon	Family and Consumer Sciences	I am employed as a web designer here locally in Winfield, KS. My kids are involved with the Tisdale 4-H Club where my husband and I are adult volunteers. My husband and I also lead a Wednesday night program for kids in grades 6th-12th at our church. My family has participated in classes through the Extension such as Med Instead of Meds, Junior Chefs, and Sitter Solutions. These classes have help us learn new skills and make healthier decisions.	My family has participated in classes through the Extension such as Med Instead of Meds, Junior Chefs, and Sitter Solutions. These classes have help us learn new skills and make healthier decisions.
Chandra	Snively	Family and Consumer Sciences	I have been a Licensed Mortician in the state of Kansas over 20 years. My family of 3 consisting of my husband, Robert and daughter, Sage live on a small farm NW of Winfield. We utilize the Extension office yearly concerning our brome and prairie hay crops we grow and sell. I am very involved in my church and volunteer in various aspects. I have attended several learning opportunities thru the Extension Office and have enjoyed all of my involvement and the knowledge taken away at each class that I attended.	My daughter was in 4-H at a younger age, so I had some involvement as a parent. I have attended classes through Cowley County Golden Tigers thru Cowley County Community College in Arkansas City. At our church, thru some of our childrens programs, we had one of the Extension Office's Program Directors come in for the kids a couple of times in which I was one of the leaders for the kids.
Georgia	Winslow	Family and Consumer Sciences	I graduated from WSU in May with a degree in business administration and am currently employed at CNB&T as a loan administrator. I have been involved in 4-H for most of my life, and that experience has given me a deep appreciation for the positive impact our Extension Office has on the community. I strongly support the work they do and would love the opportunity to contribute however I can to their efforts and to continue supporting local youth and families.	I have 10+ years of experience as a member of 4-H, and am staying involved by helping out during the fair. I've helped with the "day on the farm" event, bringing livestock to educating families about the animals and how we care for them. I have also helped with milking demonstrations while showing my dairy cattle at the fair, so families can watch and learn about the process. In my previous role at the USDA Farm Service Agency I worked to spread the word on youth loans to our local FFA group.
